JSW CEMENT STRENGTHENS PRESENCE IN EASTERN INDIA WITH COMMISSIONING OF NEW UNIT AT SAMBALPUR, ODISHA

FACILITY HAS INSTALLED CAPACITY OF 1.0 MTPA, TAKING THE TOTAL GRINDING CAPACITY OF JSW CEMENT TO 21.6 MTPA

Mumbai, 8th October, 2025: JSW Cement, a part of the diversified US\$23 billion JSW Group, has commissioned vide its subsidiary Shiva cement, a new state-of-the-art cement grinding unit at **Sambalpur in Odisha**.

In keeping with the company's strategy to strengthen its market presence in eastern India with an objective of meeting the growing demand in the region, the new facility has been funded and supervised by its majority-owned subsidiary Shiva Cement, vide a commercial arrangement with Bhushan Power and Steel Limited ("BPSL"), with a capacity to produce 1.0 MTPA exclusively for use and consumption by Shiva Cement. With this, the total installed capacity of JSW Cement, including that of its subsidiaries goes up to 21.6 MTPA.

Announcing this here today, **Mr. Nilesh Narwekar, Chief Executive Officer, JSW Cement**, said, "The eastern region of the country is poised for exponential growth in the coming years. With rapid expansion in the manufacturing and infrastructure sector in the state, Odisha is playing a key role in the industrial and economic growth in the region. This new state-of-the-art facility in Sambalpur, therefore, is a strategic initiative by JSW Cement and marks a significant milestone in our journey to expand and consolidate our position in this market. The world class unit will further consolidate and expand the eco-friendly footprint of JSW Cement.

Shiva Cement has its manufacturing facility strategically located at the geographical border of three Indian states – Odisha, Chhatisgarh and Jharkhand with close proximity to the raw materials required for the production.

JSW Cement continues to make progress on its approved expansion program to develop a pan India presence and reach 41.85 MTPA of grinding capacity along with 13.04 MTPA of clinker capacity. Work on the Nagaur integrated unit in Rajasthan, comprising 3.30 MTPA clinker capacity and 3.5 MTPA grinding capacity is expected to be commissioned as per plan. The Company continues to have lowest carbon dioxide emission intensity in the industry, with emission intensity of 277 kg CO₂ per ton of cementitious materials in Q1 FY26.

About JSW Cement:

JSW Cement is part of the US\$23 billion JSW Group - one of the fastest growing conglomerates in India with its businesses spanning across multiple sectors, including steel, energy, infrastructure, cement, paints, defence, automobiles, e-commerce, sports, realty and venture capital. JSW Cement became the fourth listed Company of the Group, successfully listing on the National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) on August 14th, 2025.

JSW Cement started its operations in 2009 in the southern region of India through a single grinding unit in Vijayanagar, Karnataka. As of Sep 30th, 2025, the Company has a cement grinding capacity of 21.60 MTPA and is among the top-10 cement companies in India in terms of installed capacity. The Company is among the top three fastest growing cement manufacturing companies in India in terms of increase in installed grinding capacity and sales volume from Fiscal 2015 to Fiscal 2025. The Company is also India's largest manufacturer of ground granulated blast furnace slag ("GGBS"), an eco-friendly product produced entirely from blast furnace slag (a by-product of the steel manufacturing process), with a market share in terms of GGBS sales of approximately 84% in Fiscal 2025.

JSW Cement operates seven manufacturing plants in India, which comprise one integrated unit, one clinker unit and five grinding units across the states of Andhra Pradesh (Nandyal), Karnataka (Vijayanagar), Tamil Nadu (Salem), Maharashtra (Dolvi), West Bengal (Salboni), Odisha (Jajpur and its majority owned Shiva Cement Limited clinker unit). The Company also operates a clinker unit through JSW Cement FZC, its Joint Venture in the UAE. The Company's product portfolio consists of blended cement (including PSC, PCC and PPC), GGBS, ordinary portland cement (OPC), clinker and a range of allied cementitious products such as ready-mix concrete (RMC), screened slag, construction chemicals and waterproofing compounds.

JSW Cement Limited has the lowest carbon dioxide emission intensity among its peer cement manufacturing companies in India and globally. The Company sells its products through a well-connected distribution network.
