JSW CEMENT LIMITED

NOTES TO THE STANDALONE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH 2024

1. General Information

JSW Cement Limited is a public limited company incorporated in India on March 29, 2006 under the Companies Act, 1956. The registered office of the Company is JSW Centre, Bandra Kurla Complex, Bandra (East), Mumbai – 400 051.

JSW Cement Limited ("the Company") is engaged in the business of manufacture and sale of cement, ground granulated blast furnace slag and clinker and trading of allied products. The Company is operating ~ 4.00 million tonne per annum grinding unit at Vijayanagar- Karnataka, ~ 4.20 million tonne per annum cement manufacturing unit at Bilkalguduru village near Nandyal- Andhra Pradesh, ~ 4.50 million tonne per annum grinding unit at Dolvi Maharashtra, ~ 3.60 million tonne per annum grinding unit at Salboni village in West Bengal, ~ 1.50 million tonne per annum grinding unit at Jajpur in Odissa and ~ 0.80 million tonne per annuam grinding unit at Salem in Tamilnadu.

2. MATERIAL ACCOUNTING POLICIES

I. Statement of Compliances

Standalone Financial Statements have been prepared in accordance with the accounting principles generally accepted in India including Indian Accounting Standards (Ind AS) prescribed under the section 133 of the Companies Act, 2013 read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation and disclosures requirement of Division II of revised Schedule III of the Companies Act 2013, (Ind AS Compliant Schedule III), as applicable to Standalone Financial Statements.

Accordingly, the Company has prepared these Standalone Financial Statements which comprise the Standalone Balance Sheet as at 31 March 2024, the Standalone Statement of Profit and Loss, the Standalone Statement of Cash Flows and the Standalone Statement of Changes in Equity for the year ended as on that date, and accounting policies and other explanatory information (together hereinafter referred to as "Standalone Financial Statements").

These Standalone Financial Statements are approved for issue by the Board of Directors on 21st May 2024.

II. Basis of preparation and presentation

The Standalone Financial Statements have been prepared on the historical cost convention, on the accrual basis except for certain financial instruments measured at fair values at the end of each reporting year, as explained in the accounting policies below.

The Standalone Financial Statements are presented in Indian Rupees (which is also the functional currency of the Company) and is rounded off to the nearest crores except otherwise indicated. Amounts less than ₹ 50,000 have been presented as "*"

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes in account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these Standalone Financial Statements is determined on such

a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS116, fair value of plan assets within the scope of Ind AS 19 and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within level 1, that are observable for the
 asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

Current and non-current classification

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realised in or is intended for sale or consumption in, the Company's normal operating cycle. it is held primarily for the purpose of being traded;
- It is expected to be realised within 12 months after the reporting date; or
- It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- It is expected to be settled in the Company's normal operating cycle;
- It is held primarily for the purpose of being traded;
- It is due to be settled within 12 months after the reporting date; or the Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The company has identified 12 months as its operating cycle.

Deferred tax assets and liabilities are classified as non-current only.

III. Revenue Recognition

A. Sale of Goods

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

Contract Balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration.

ii) Trade receivable

Trade receivables that do not contain a significant financing component are measured at transaction price.

iii) Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract including Advance received from Customer.

iv) Refund liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer including volume rebates and discounts. The Company updates its estimates of refund liabilities at the end of each reporting period.

B. Dividend and interest income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

IV. Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Company as lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and accumulated impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Company is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term is as follows.

Sr. No.	Class of assets	Years
1	Leasehold land	5-99 Years
2	Building	2-10 Years
3	Plant and Machinery	9 -25 Year

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. Right-of-use assets are subject to impairment test.

The Company accounts for sale and lease back transaction, recognising right-of-use assets and lease liability, measured in the same way as other right-of use assets and lease liability. Gain or loss on the sale transaction is recognised in Standalone Statement of Profit and Loss.

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (such as tablets, computers, small items of office furniture and telephones). Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

V. Foreign Currencies

The functional currency of the Company is determined on the basis of the primary economic environment in which it operates. The functional currency of the Company is Indian National Rupee (INR).

The transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting year, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in Standalone Statement of Profit and Loss in the year in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- b) exchange differences on transactions entered into in order to hedge certain foreign currency risks (see below the policy on hedge accounting in 2 (XVII)(C)(c));

VI. Borrowing Costs

Borrowing costs directly attributable to the acquisition and construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in the Standalone Statement of Profit and Loss in the year in which they are incurred.

The Company determines the amount of borrowing costs eligible for capitalisation as the actual borrowing costs incurred on that borrowing during the year less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset. In case if the Company borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalisation are determined by applying a capitalisation rate to the expenditures on that asset.

Borrowing cost includes exchange difference arising from foreign currency borrowings to the extent they are regarded as an adjustment to finance cost.

VII. Government grants

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attached to them and that the grants will be received.

Government grants are recognised in the Standalone Statement of Profit and Loss on a systematic basis over the years in which the Company recognises as expenses the related costs for which the grants are intended to compensate or when performance obligations are met.

VIII. Employee Benefits

Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting year. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the Balance sheet with a charge or credit recognised in other comprehensive income in the year in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to Standalone Statement of Profit and Loss. Past service cost is recognised in Standalone Statement of Profit and Loss in the year of a plan amendment or when the company recongnises corresponding restructuring cost whichever is earlier. Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- re-measurement

The Company presents the first two components of defined benefit costs in Standalone Statement of Profit and Loss in the line item 'Employee benefits expenses'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the Balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick/contingency leave in the year the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

IX. Share based payments

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 38e.

The fair value determined at the grant date of the equity settled share-based payments is expensed on a straight line basis over the vesting period, based on the Company's estimate of equity instruments that will

eventually vest, with a corresponding increase in equity. At the end of each reporting year, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in Standalone Statement of Profit and Loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

The Company has created an Employee Welfare Trust for providing share-based payment to its employees. The Company uses the Trust as a vehicle for distributing shares to employees under the employee remuneration schemes.

X. Taxes

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

Current tax is the amount of expected tax payable based on the taxable profit for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Standalone Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting year and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an deferred tax asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting year.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Current and deferred tax for the year

Current and deferred tax are recognised in profit and loss, except when they are relating to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax

are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

XI. Property, Plant and Equipment

The cost of property, plant and equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, including relevant borrowing costs for qualifying assets and any expected costs of decommissioning. Expenditure incurred after the property, plant & equipment have been put into the operation, such as repairs and maintenance, are charged to Standalone Statement of Profit and Loss in the year in which cost are incurred. Major shutdown and overhaul expenditure is capitalised as the activity undertaken improves the economic benefit expected to arise from the assets.

Spares parts, servicing equipment and standby equipment which can be used only in connection with a particular Plant & Equipment of the Company and their use is expected to be irregular, are capitalised at cost. An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in Standalone Statement of Profit and Loss.

Assets in the course of construction are capitalised in the assets under Capital work in progress. At the point when an asset is operating at management's intended use, the cost of construction is transferred to the appropriate category of property, plant and equipment and depreciation commences. Costs associated with the commissioning of an asset and any obligatory decommissioning costs are capitalised where the asset is available for use but incapable of operating at normal levels, revenue (net of cost) generated from production during the trial period is capitalised.

Property, plant and equipment except freehold land held for use in the production, supply or administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any.

The Company has elected to continue with the carrying value for all of its property, plant and equipment as recognised in the Standalone Financial Statements on transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition.

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of following categories of assets, in whose case the life of the assets has been assessed as under based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support etc.

Estimated useful lives of the assets are as follows:

Sr. No.	Class of Property, plant and equipment	Useful life of assets in years
1	Plant and Machinery	3 to 65 years
2	Factory Building	3 to 65 years
3	Non-Factory Building	3 to 65 years

When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives.

Major overhaul costs are depreciated over the estimated life of the economic benefit derived from the overhaul. The carrying amount of the remaining previous overhaul cost is charged to the Standalone Statement of Profit and Loss if the next overhaul is undertaken earlier than the previously estimated life of the economic benefit.

Freehold lands are not depreciated.

Expense Incurred for improvement of leasehold assets which are expected to have future economic benefit are capitalised and amortise over the term of the lease.

Capital assets whose ownership does not vest with the Company are amortised based on the estimated useful life as follows:

Sr. No.	Class of Property, plant and	Useful life of
	equipment	assets in years
1	Switching substation	35 years
2	Railway Siding	15 years
3	Road	25 years
4	Leasehold improvement	3-10 years

The Company reviews the residual value, useful lives and depreciation method annually and, if expectations differ from previous estimates, the change is accounted for as a change in accounting estimate on a prospective basis.

XII. Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting year, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

Class of assets	Years
Software	3 years

Mining assets are amortised using unit of production method over the entire lease term.

The Company has elected to continue with carrying value of all its intangible assets recognised as on transition date, measured as per the previous GAAP and use that carrying value as its deemed cost as of transition date.

Mining Assets

Acquisition Costs

The cost of Mining Assets capitalised includes costs associated with acquisition of licenses and rights to explore, stamp duty, registration fees and other such costs.

Bid premium and royalties payable with respect to mining operations is contractual obligation. The said obligations are variable and linked to market prices. The Company has accounted for the same as expenditure on accrual basis as and when related liability arises as per respective agreements/ statute.

Exploration and evaluation

Exploration and evaluation expenditure incurred after obtaining the mining right or the legal right to explore are capitalised as exploration and evaluation assets (intangible assets) and stated at cost less impairment. Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount.

The Company measures its exploration and evaluation assets at cost and classifies as Property, plant and equipment or intangible assets according to the nature of the assets acquired and applies the classification consistently. To the extent that tangible asset is consumed in developing an intangible asset, the amount reflecting that consumption is capitalised as a part of the cost of the intangible asset.

Exploration expenditure includes all direct and allocated indirect expenditure associated with finding specific mineral resources which includes depreciation and applicable operating costs of related support equipment and facilities and other costs of exploration activities:

General exploration costs - costs of surveys and studies, rights of access to properties to conduct those studies (e.g., costs incurred for environment clearance, defense clearance, etc.), and salaries and other expenses of geologists, geophysical crews and other personnel conducting those studies.

Costs of exploration drilling and equipping exploration - Expenditure incurred on the acquisition of a license interest is initially capitalised on a license by-license basis. Costs are held, undepleted, within exploration and evaluation assets until such time as the exploration phase on the license area is complete or commercial reserves have been discovered.

Stripping cost

Developmental stripping costs in order to obtain access to quantities of mineral reserves that will be mined in future periods are capitalised as part of mining assets. Capitalisation of developmental stripping costs ends when the commercial production of the mineral reserves begins.

Production stripping costs are incurred to extract the minerals in the form of inventories and/or to improve access to an additional component of a mineral body or deeper levels of material. Production stripping costs are accounted for as inventories to the extent the benefit from production stripping activity is realised in the form of inventories.

Other production stripping cost incurred are expensed in the Standalone Statement of Profit and Loss.

Developmental stripping costs are presented within mining assets. After initial recognition, stripping activity assets are carried at cost less accumulated amortisation and impairment. The expected useful life of the identified component of the mineral is used to depreciate or amortise the stripping asset.

Mine restoration, rehabilitation and environmental costs:

Provision is made for costs associated with restoration and rehabilitation of mining sites as soon as the obligation to incur such costs arises. Such restoration and closure costs are typical of extractive industries and they are normally incurred at the end of the life of the mine. The costs are estimated on the basis of mine closure plans and the estimated discounted costs of dismantling and removing these facilities and the costs of restoration are capitalised. The provision for decommissioning assets is based on the current estimates of the costs for removing and decommissioning production facilities, the forecast timing of settlement of decommissioning liabilities and the appropriate discount rate. A corresponding provision is created on the liability side. The capitalised asset is charged to profit and loss over the life of the asset through amortisation over the life of the operation and the provision is increased each period via unwinding the discount on the provision. Management estimates are based on local legislation and/or other agreements are reviewed periodically.

The actual costs and cash outflows may differ from estimates because of changes in laws and regulations, changes in prices, analysis of site conditions and changes in restoration technology. Details of such provisions are set out in note 22

XIII. Impairment of Non-financial assets

At the end of each reporting year, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the Standalone Statement of Profit and Loss.

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated in order to determine the extent of the impairment loss, if any.

XIV. Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost of raw materials include cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost of semi-finished /finished goods and work in progress include cost of direct materials and labor and a proportion of manufacturing overheads based on the normal operating capacity but excluding borrowing costs. Cost of traded goods include purchase cost and inward freight.

Costs of inventories are determined on weighted average basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

XV. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. However, before a separate provision for an onerous contract is established, the Company recognises any write down that has occurred on assets dedicated to that contract. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. The cost of fulfilling a contract comprises the costs that relate directly to the contract (i.e., both incremental costs and an allocation of costs directly related to contract activities).

XVI. Investment in subsidiaries, associates and joint venture

Investment in subsidiaries, associates and joint ventures are shown at cost in accordance with the option available in Ind AS 27, 'Separate Financial Statements'. Where the carrying amount of an investment in greater than its estimated recoverable amount, it is written down immediately to its recoverable amount and the difference is transferred to the Standalone Statement of Profit and Loss. On disposal of investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Standalone Statement of Profit and Loss.

XVII. Financial Instruments

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through Statement of Profit and Loss (FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit and loss are recognised immediately in Standalone Statement of Profit and Loss.

A. Financial assets

a) Recognition and initial measurement

A financial asset is initially recognised at fair value and, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. Purchases and sales of financial assets are recognised on the trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument.

b) Classification of financial assets

Financial assets are classified, at initial recognition and subsequently measured at amortised cost. fair value through other comprehensive income (OCI) and fair value through profit and loss. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is classified as FVTOCI only if it meets both of the following conditions and is not recognised at FVTPL;

- The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the Other Comprehensive Income (OCI). However, the Company recognises interest income, impairment losses & reversals and foreign exchange gain or loss in the Standalone Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Standalone Statement of Profit and Loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

All equity investments in scope of Ind AS 109 are measured at fair value. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. The equity instruments which are strategic investments and held for long term purposes are classified as FVTOCI.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to Standalone Statement of Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the Standalone Statement of Profit and Loss.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVTOCI as at FVTPL if doing so eliminates or significantly reduces and accounting mismatch that would otherwise arise.

Financial assets at FVTPL are measured at fair value at the end of each reporting year, with any gains and losses arising on remeasurement recognised in Standalone Statement of Profit and Loss. The net gain or loss recognised in Standalone Statement of Profit and loss incorporates any dividend or interest earned on the financial asset and is included in the 'other income' line item. Dividend on financial assets at FVTPL is recognised when:

- The Company's right to receive the dividends is established,
- It is probable that the economic benefits associated with the dividends will flow to the entity,
- The dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

c) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

d) Impairment

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared to the previous year, the Company again measures the loss allowance based on 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

The impairment requirements for the recognition and measurement of a loss allowance are equally applied to debt instruments at FVTOCI except that the loss allowance is recognised in other comprehensive income and is not reduced from the carrying amount in the balance sheet.

The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets.

e) Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the 'Other income' line item.

B. Financial liabilities and equity instruments

a) Classification as debt or equity

Debt and equity instruments issued by a company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

b) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in Standalone Statement of Profit and Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

c) Financial liabilities

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

Financial liabilities at FVTPL:

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- It has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.
- A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:
- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is
 managed and its performance is evaluated on a fair value basis, in accordance with the Company's
 documented risk management or investment strategy, and information about the grouping is
 provided internally on that basis: or
- it forms part of a contract containing one or more embedded derivatives, and Ind AS 109 permits the entire combined contract to be designated as at FVTPL in accordance with Ind AS 109.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in Standalone Statement of Profit and Loss. The net gain or loss recognised in Standalone Statement of Profit and Loss incorporates any interest paid on the financial liability and is included in Standalone Statement of Profit and Loss. For Liabilities designated as FVTPL, fair value gains/losses attributable to changes in own credit risk are recognised in OCI.

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Standalone Statement of Profit and Loss.

Other financial liabilities:

The Company enters into deferred payment arrangements (acceptances) whereby overseas lenders such as banks and other financial institutions make payments to supplier's banks for import of raw materials and property, plant and equipment. The banks and financial institutions are subsequently repaid by the

Company at a later date providing working capital benefits. These arrangements are in nature of credit extended in normal operating cycle and these arrangements for raw materials are recognised as part of trade payables and the arrangements for property, plant and equipment are recognised as other financial liabilities. Interest borne by the company on such arrangements is accounted as finance cost. Other financial liabilities are subsequently measured at amortised cost using the effective interest method.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Standalone Statement of Profit and Loss.

C. Derivative instruments and Hedge Accounting:

a) Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate, commodity price and foreign exchange rate risks, including foreign exchange forward contracts, commodity forward contracts, interest rate swaps and cross currency swaps.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting year. The resulting gain or loss is recognised in Standalone Statement of Profit and Loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in Standalone Statement of Profit and Loss depends on the nature of the hedge item.

b) Embedded derivatives

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit and loss.

If the hybrid contract contains a host that is a financial asset within the scope of Ind AS 109, the Company does not separate embedded derivatives. Rather, it applies the classification requirements contained in Ind AS 109 to the entire hybrid contract. Derivatives embedded in all other host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value though profit and loss. These embedded derivatives are measured at fair value with changes in fair value recognised in profit and loss, unless designated as effective hedging instruments.

c) Hedge accounting

The Company designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency, interest rate and commodity risk, as either cash flow hedge, fair value hedge. Hedges of foreign currency risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to hedged risk.

(i) Fair value hedges

Changes in fair value of the designated portion of derivatives that qualify as fair value hedges are recognised in the Standalone Statement of Profit and Loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the designated portion of hedging instrument and the change in the hedged item attributable to hedged risk are recognised in profit or loss. In the line item relating to the hedged item.

The Company designates only the spot component for derivative instruments in fair value Hedging relationship. The Company defers changes in the forward element of such instruments in hedging reserve and the same is amortised over the period of the contract.

When the Company designates only the intrinsic value of the option as the hedging instrument, it account for the changes in the time value in OCI. This amount is be removed from OCI and recognised in P&L, either over the period of the hedge if the hedge is time related, or when the hedged transaction affects P&L if the hedge is transaction related.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. For fair value hedges relating to items carried at amortised cost, the fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit and loss from that date.

(ii) Cash flow hedges

The effective portion of changes in fair value of derivatives and non-derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in Standalone Statement of Profit and Loss.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to effective portion as described above are reclassified to profit and loss in the years when the hedged item affects profit and loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, such gains or losses are transferred from equity (but not as a reclassification adjustment) and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit and loss. When a forecast transaction is no

longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit and loss.

XVIII. Cash and cash equivalents:

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to insignificant risk of changes in value.

For the purpose of the Standalone Statement of cash flows, cash and cash equivalent consists of cash and short term deposits, as defined above.

XIX. Segment reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

The Board of directors of the Company has been identified as the Chief Operating Decision Maker which reviews and assesses the financial performance and makes the strategic decisions.

XX. Earnings Per Share:

Basic Earnings per share is computed by dividing the net profit or loss after tax for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted Earnings per share is computed by dividing the net profit or loss for the year by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the results are anti-dilutive.

3. Key sources of estimation uncertainty and recent accounting pronouncement

In the course of applying the policies outlined in all notes under section 2 above, the Company is required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision and future year, if the revision affects current and future year.

A) Key sources of estimation uncertainty

i) Useful lives of property, plant and equipment

Management reviews the useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors including relative efficiency and operating costs. This reassessment may result in change in depreciation and amortisation expected in future periods.

ii) Impairment of investments in subsidiaries, Joint ventures and associates

Determining whether the investments in subsidiaries, joint ventures and associates are impaired requires an estimate in the value in use of investments. In considering the value in use, Management have anticipated the future commodity prices, capacity utilisation of plants, operating margins,

mineable resources and availability of infrastructure of mines, discount rates and other factors of the underlying businesses/ operations of the investee companies etc. for arriving at the future cash flows expected to arise from the cash generating units, and discount rates in order to calculate the present value of such cash flows. Any subsequent changes to the cash flows due to changes in the above mentioned factors could impact the carrying value of investments.

iii) Provisions and liabilities

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgement to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Potential liabilities that are remote are neither recognised nor disclosed as contingent liability. The management decides whether the matters needs to be classified as 'remote,' 'possible' or 'probable' based on expert advice, past judgements, terms of the contract, regulatory provisions etc.

iv) Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystalising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not recognised. The cases which have been determined as remote by the Company are not disclosed.

Contingent assets are neither recognised nor disclosed in the Standalone Financial Statements unless when an inflow of economic benefits is probable.

v) Fair value measurements

When the fair values of financial assets or financial liabilities recorded or disclosed in the Standalone Financial Statements cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flows model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgements include consideration of inputs such as liquidity risk, credit risk and volatility.

vi) Provision for mine restoration

Provision for mine restoration are estimated case by-case based on available information, taking into account applicable local legal requirements. The estimation is made using existing technology, at current prices, and discounted using an appropriate discount rate where the effect of time value of money is material. Management reviews all assumptions annually and any changes is accounted accordingly.

vii) Taxes

Pursuant to the announcement of the changes in the corporate tax regime, the Companies have an option to either opt for the new tax regime or continue to pay taxes as per the old applicable tax structure together with the other benefits available to the Companies including utilisation of the MAT credit available. This requires significant estimation in determining in which year the company would

migrate to the new tax regime basis future year's taxable profits including the impact of ongoing expansion plans of the Company and consequential utilisation of available MAT credit. Accordingly, in accordance with IND AS 12 - Income Taxes, deferred tax assets and liabilities are required to be measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

viii) Leases

If an arrangement contains a lease, the parties to the arrangement shall apply the requirements of Ind AS 116 to the lease element. Therefore, the Company is required to separate payments and other consideration required by the arrangement into those for the lease and for other elements on the basis of their relative fair values. However, Management has concluded that it is impracticable to separate both the elements reliably and has recognised an asset and a liability at an amount equal to the carrying value of the specified asset in the books of the lessor. Subsequently, the liability has been reduced as payments are made and an imputed finance charges on the liability recognised using the Company's incremental borrowing rate of interest over the tenure of the arrangement. The total payments less payments made towards lease obligation and imputed finance charges have been considered to be the consideration for elements other than lease.

In case of arrangements which are identified to be in the nature of finance lease, the management concluded that it is impracticable to derive the relative fair values of lease and other elements of the arrangement and has accordingly determined the consideration for elements other than lease as a residual post appropriation of lease payments derived based on lessee's incremental borrowing rate of interest on the lease obligation corresponding to the respective gross asset values in the books of lessor.

ix) Defined benefits plans

The cost of defined benefit plan and other post employment benefits and the present value of such obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual development in the future. These include the determination of the discount rate, future salary escalations and mortality rates etc. Due to the complexities involved in the valuation and its long term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

x) Expected credit loss

The policy for expected credit loss allowances for financial assets is based on the evaluation of collectability and the management's judgement considering external and internal sources of information. A considerable amount of judgement is required in assessing the ultimate realisation of the amount receivable having regard to, the past collection history of each party, ongoing dealings with these parties, and assessment of their ability to pay the debt on designated dates.

B) Critical accounting judgements in applying accounting policy

i) Joint control over JSW Cement FZC (Formerly known as 'JSW Cement FZE')

During the year, Aquarius Global Fund PCC has acquired additional stake in JSWFZC, resulting in dilution of JSWCL's stake in JSWFZCL. Accordingly, JSWCL stake is reduced to effective shareholding of 55.05% in JSWFZC. Pursuant to the Shareholder's agreement, JSW Cement Limited (JSWCL) and

Aquarius Global Fund PCC ('AGFP') will jointly control JSW Cement FZC ('JSWFZC') (formerly known as 'JSW Cement FZE').

As per the agreement, all the relevant activities of JSWFZC that affect its variable returns will be decided unanimously by the representatives of JSWCL and AGFP. Thus, the Company has concluded that it has joint control over JSWFZC.

ii) Joint control over JSW One Platforms Limited (Formerly known as 'JSW Retail Limited')

Pursuant to the Shareholder's agreement, JSW Steel Limited (JSWSL), JSW Paints Private Limited (JPPL) and JSW Cement Limited (JSWCL) have been jointly controlling JSW One Platforms Limited ('JOPL') (formerly known as 'JSW Retail Limited'). During the previous year, Mitsui and Co., Ltd. (Mitsui), had acquired 8.2% stake in JOPL, resulting in dilution of JSWCL's stake in JOPL by 1.32%. JSWCL has made an investment of Rs. 37.40 crores through equity shares having an effective shareholding of 13.68% in JOPL. As per the shareholder's agreement among JSWSL, JPPL and JSWCL, all the relevant activities of JOPL that affect its variable returns will continue to be decided unanimously by the representatives of JSWSL, JSWCL & JPPL. Thus, the Company has concluded that it has joint control over JOPL.

iii) Determining the lease term of contracts with renewal and termination options – Company as Jessee.

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The Company has several lease contracts that include extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

iv) Incentives under the State Industrial Policy

a. Industrial Promotional Assistance for Salboni Grinding Unit

The Company had applied for Industrial Promotional Assistance for Salboni Grinding Unit from Government of West Bengal under the West Bengal State Support for Industries Scheme, 2013 (WBSSIS, 2013) and was granted preliminary registration certificate (RC-I) on June 28, 2017 as an eligible unit. Even after complying with all the conditions and filing of application for grant of final registration certificate (RC-II) within stipulated time, the authorities rejected the application for grant of RC Part-II on the alleged ground that Company had not filed the application for grant of RC -II within stipulated time of commencement of commercial production. Pursuant to which, the Company filed Writ Petition Application (WPA) with Honorable High Court of Kolkata against the Government of West Bengal and others on February 23, 2021 and December 6, 2022. The High Court has ordered the authorities to comply with the steps under the policy/ scheme and consider the documents shared by the Company, however the authorities have rejected the Company's application. The third WPA is filed on April 27, 2023 for which hearing is awaited. Based on the Company's assessment coupled with the advice / opinion obtained from independent / external legal counsel, the Company is confident of the ultimate recovery of the amount accrued during the year of ₹ 62.55 crore (March 31, 2023: ₹ 62.59 crore) and the outstanding claim balance as on March 31, 2024 of ₹ 331.44 crore (March 31, 2023: ₹ 268.89 crore).

b. Industrial Policy Resolution 2015 for Jajpur Grinding Unit

The Company has applied for provisional Priority Sector certificate to the Regional Industry Centre (RIC) for its Jajpur Grinding Unit under Industrial Policy Resolution, 2015 ("IPR 2015 Scheme") on

August 16, 2017. While the approval in respect of this application was pending, the Government of Odisha vide resolution no. IND-HI2-POL-0003-2016- 5248/I dated 18.08.2020 ('Amendment Resolution') amended IPR 2015 Scheme with retrospective effect to exclude cement manufacturing / grinding units from availing financial incentives in the form of SGST reimbursements. The Company has challenged the constitutional validity of the retrospective change in the scheme and has filed writ petition before the Hon'ble Orissa High Court on December 21, 2020 whose hearing is awaited.

Based on the Company's assessment coupled with the advice / opinion obtained from independent / external legal counsel, the Company is confident of the ultimate recovery of the amount accrued during the year of ₹ 26.53 crore (March 31, 2023: ₹ 25.48 crore) and the outstanding claim balance as on March 31, 2024 of ₹ 71.43 crore (March 31, 2023: ₹ 44.90 crore).

Considering the timing of the recovery, the incentive amount is classified as non-current financial asset for Salboni and Jajpur griding unit and The Company has recorded a charge for the time value of money amounting to ₹ 54.78 crore.

c. Incentive Scheme Under IIPP 2010-15 for Nandyal Integrated Unit

At Andhra Pradesh, the Company was eligible for incentives under the Industrial Investment Promotion Policy (IIPP 2010-15) and Industrial Development Policy 2015-20 and ₹ 93.57 crore were recognised in books of account. The company has received ₹. 51.27 crores out of ₹ 93.57 crore and a sum of ₹ 42.30 crore remains recoverable. Aggricved by the delay in receipt of these incentives, The Company has approached Hon'ble High Court by way of filing Writ Petition on 14 February, 2021. The High court vide its order dated 31st March, 2022 has instructed the State Government to clear the incentives due to the Company.

The Company is confident of recovering the amount within next twelve months; accordingly, these incentives have been classified as current financial asset.

C) Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. For the year ended 31st March, 2024, MCA has not notified any new standards or amendments to the existing standards applicable to the Company.

JSW CEMENT LIMITED NOTES TO STANDALONE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31st March. 2024

1. Terms of 1% Optionally Convertible, cumulative, redeemable preference shares (OCCRPS) of ₹ 100 each of Shiva Cement Limited:

The Company had invested in OCCRPS in month of February 2021. The tenure of OCCRPS is 9 years, however it is convertible into Equity Shares at the option of the holder within a period of 18 months from the date of allotment, in one or more tranches, at a price determined on the date of conversion. In case, OCCRPS are not converted into equity shares within the period of 18 months, OCCRPS shall be redeemable at par upon maturity of 9 years or redeemed early at the option of the issuer after 18 months, at 12 monthly intervals from the date of allotment. The company chose not to exercise the conversion option within a period of 18 months.

2. Terms of 8% non convertible, non cumulative redeemable preference shares (NCRPS) of ₹ 10 each of Everbest Consultancy Service Private Limited:

The Preference shares were alloted in the month of November, 2020 and are redeemable at par after completion of 10 years from the date of allotment. The Issuer has an option to redeem all / part of NCRPS at any time after completion of 3 years from the date of allotment at par on the Face Value of the preference shares. The issuer has opted to redeem the entire NCPRS in FY 2024-25.

3. Terms of 0.001% Compulsory convertible debentures (CCD) of ₹ 100 each of Algebra Endeavour Private Limited:

The Company had invested in CCDs in the month of November 2021. The term of CCD shall be 10 years from allotment of CCDs. For tranche A, 1,950,000 CCDs shall be converted into equity shares at the earlier of 30th June, 2025 or acquisition of an entity as defined in agreement. For tranche B, 6,000,000 CCDs shall be converted into equity shares on acquisition of an entity as defined in agreement. If the entity is not acquired the holder shall have an option to convert the CCDs into equity shares on or after 30th June, 2025 till end of tenure. The conversion ratio is defined in agreement for tranche A and tranche B.

4. Terms of Zero Coupon optionally convertible debentures (OCD) of ₹ 100,000 each redeemable at premium of JSW Sports Limited:

The Company had invested in OCD in the month of March 2020, Issuer shall have right to redeem the OCD any time during the tenure of 10 years, either in part or full and in one or more tranches, at face value along with accumulated premium @ 9.50% p.a. from date of allotment till date of redemption for such number of OCD as it intends to redeem. Any time during the tenure of 10 years, the issuer may, convert all or part of the outstanding OCD at face value along with accumulated premium @ 9.50% from date of allotment till the date of conversion such number of OCD as it intends to convert, into such number of equity shares as may be derived based on market value as on date of conversion. The issuer has opted to redeem the entire OCD in FY 2024-25.

Retained earning

Retained earnings comprise balances of accumulated (undistributed) profit and loss at each year end and balances of remeasurement of net defined benefit plans.

Equity settled share based payment reserve

The Company offers ESOP, under which options to subscribe for the Company's share have been granted to certain employees and senior management. The share based payment reserve is used to recognise the value of equity settled share based payments provided as part of ESOP schemes.

Equity instrument through other comprehensive income

The fair value change of the equity instruments measured at fair value through other comprehensive income is recognised in equity instruments through other comprehensive income.

Effective portion of cash flow hedges

Effective portion of cash flow hedges represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges, which shall be reclassified to profit and loss only when the hedged transaction affects the profit and loss, or included as as basis adjustment to the non-financial hedged item, consistent with the Company accounting policies.

Closing balance	68.83	67.70	

Mine restoration expenditure is incurred on an ongoing basis until the closure of the site. The actual expenses may vary based on the nature of restoration.

23. Income tax

Indian companies are subject to Indian income tax on a standalone basis. Each entity is assessed to tax on taxable profits determined for each fiscal year beginning on April 1 and ending on March 31. For each fiscal year, the Company's profit or loss is subject to the higher of the regular income tax payable or the Minimum Alternative Tax ("MAT")

Statutory income taxes are assessed based on book profits prepared under generally accepted accounting principles in India adjusted in accordance with the provisions of the (Indian) Income Tax Act, 1961. Statutory income tax is charged at 30% plus a surcharge and education cess.

MAT is assessed on book profits adjusted for certain items as compared to the adjustments followed for assessing regular income tax under normal provisions, MAT for the fiscal year 2023-24 is charged at 15% plus a surcharge and education cess. MAT paid in excess of regular income tax during a year can be set off against regular income taxes within a period of fifteen years succeeding the fiscal year in which MAT credit arises subject to the limits prescribed.

Business loss can be carried forward for a maximum period of eight assessment years immediately succeeding the assessment year to which the loss pertains. Unabsorbed depreciation can be carried forward for an indefinite period,

36. Financial instruments

A. Capital management

The objective is to maintain a strong credit rating, healthy capital ratios and establish a capital structure that would maximise the return to stakeholders through optimum mix of debt and equity.

The Company's capital requirement is mainly to fund its capacity expansion and strategic acquisitions. The principal source of funding of the Company has been, and is expected to continue to be, cash generated from its operations supplemented by funding from bank borrowings and the capital markets. The Company is not subject to any externally imposed capital requirements.

The Company regularly considers other financing and refinancing opportunities to diversify its debt profile, reduce interest cost and align maturity profile of its debt commensurate with life of the asset and closely monitors its judicious allocation amongst competing capital expansion projects and strategic acquisitions, to capture market opportunities at minimum risk.

The Company monitors its capital using gearing ratio, which is net debt divided to total equity. Net debt includes, interest bearing loans and borrowings less cash and cash equivalents, bank balances other than cash and cash equivalents and current investments.

₹ crore As at As at Particulars 31st March, 2024 31st March, 2023 Long term barrowings 3,522.06 4.036.19 Short term borrowings 1,648,45 770,14 Less: Cash and cash equivalent (93.89) (47.95)Less: Bank balances other than cash and cash equivalents (195.94)12 091 Net debt 4,880,68 4.756.29 Total equity 2,686_46 2,384,31 Gearing ratio 1.82 1.99

- (i) Equity includes all capital and reserves of the Company that are managed as capital (Refer note 18 and 19)
- (ii) Debt is defined as long and short-term borrowings (excluding derivatives and financial guarantee contracts), as described in notes 20 and 24.

The Company consider that carrying amounts of financial assets and liabilities disclosed above approximates their fair value.

C. Fair value hierarchy

A significant part of the financial assets is classified as Level 1 and Level 2. The fair value of these assets is marked to an active market or based on observable market data. The financial assets carried at fair value by the Company are mainly investments in equity instruments, debt securities and derivatives, accordingly, any material volatility is not expected.

Particulars 31st March, 2024 Level Valuation technique(s) and key input(s) 31st March, 2023 Quoted investment in equity shares measured at 139.08 Level 1 Quoted bid prices in an active market, FVTOCI Non current investment in unquoted preference 160.07 148,38 Level 3 Discounted cash flow - Future cash flows are based on shares measured at FVTPL terms of Preference Shares discounted at a rate that reflects market risks. E). Financial risk management

The Company has a Risk Management Committee established by its Board of Directors for overseeing the Risk Management Framework and developing and monitoring the Company's risk management policies. The risk management policies are established to ensure timely identification and evaluation of risks, setting acceptable risk thresholds, identifying and mapping controls against these risks, monitor the risks and their limits, improve risk awareness and transparency, Risk management policies and systems are reviewed regularly to reflect changes in the market conditions and the Company's activities to provide reliable information to the Management and the Board to evaluate the adequacy of the risk management framework in relation to the risk faced by the Company.

The risk management policies aims to mitigate the following risks arising from the financial instruments:

- Market risk
- Interest rate risk
- · Credit risk; and
- Liquidity risk

i) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market prices. The Company is exposed in the ordinary course of its business to risks related to changes in foreign currency exchange rates and interest rates.

The Company seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies approved by the Board of Directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the Management and the internal auditors on a continuous basis. The Company does not enter into or trade financial instruments, including derivatives for speculative purposes.

ii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk because funds are borrowed at both fixed and floating interest rates, Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate.

The following table provides a break-up of the Company's fixed and floating rate borrowing:

₹ crore

Particular	As at 31st March, 2024	As at 31st March, 2023
Fixed rate borrowings		-4
Floating rate borrowings	3,434.41	3,207.46
Total gross borrowings	3,434.41	3,207.46
Less: Upfront fees	(11.16)	(11.25)
Total borrowings	3,423.25	3,196.21

The sensitivity analyses below have been determined based on the exposure to interest rates for floating rate liabilities assuming the amount of the liability outstanding at the year-end was outstanding for the whole year.

If interest rates had been 100 basis points higher / lower and all other variables were held constant, the Company's profit for the year ended 31st March 2024 would decrease / increase by ₹ 32,07 crore). This is mainly attributable to the Company's exposure to interest rates on its variable rate borrowings.

The following table details the nominal amounts and remaining terms of interest rate swap contracts outstanding at the year-end

As at	Nature	No. of Contracts	US\$ equivalent
			(Million)
31st March 2024	Liabilities	2	48.00
31st March 2023	Liabilities	341	2

The following table provides a break-up of the Company's fixed and floating rate loan given:

₹ croi

Particular	As at	As at	
	31st March, 2024	31st March, 2023	
Fixed rate loan given	90.30	959.82	
Floating rate loan given	1,014.98		
Total loan given	1,105.28	959.82	

The sensitivity analyses below have been determined based on the exposure to interest rates for floating rate loans given assuming the amount of the loans given outstanding at the year-end was outstanding for the whole year.

If interest rates had been 100 basis points higher / lower and all other variables were held constant, the Company's profit for the year ended 31st March 2024 would increase / decrease by ₹ Nil). This is mainly attributable to the Company's exposure to interest rates on its variable rate loan given.

iii) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults,

The Company is exposed to credit risk for trade receivables, cash and cash equivalents, investments, other bank balances, loans, other financial assets, financial guarantees and derivative financial instruments.

Financial guarantee:

In respect of financial guarantees provided by the Company to banks and financial institutions, the maximum exposure which the Company is exposed to is the maximum amount which the Company would have to pay if the guarantee is called upon. Based on the expectation at the end of the reporting period, the Company considers that it is more likely than not that such an amount will not be payable under the guarantees provided.

Incentives receivable from the Government

The Company units at Salboni in West Bengal & Jajpur in Odisha are eligible for incentives under the respective state government policy/ scheme for availing incentives in the form of VAT/ SGST reimbursement. The Company accrued these incentives as refund claims in respect of VAT/GST paid, on the basis that all attaching conditions were fulfilled by the Company and there was reasonable assurance that the incentive claims will be disbursed by the State Governments, For expected credit loss refer note 3B(iv),

The Company is confident about the ultimate realisation of the dues from the State Governments and there is no risk of default.

Trade receivables

Customer credit risk is managed centrally by the Company and subject to established policy, procedures and control relating to customer credit risk management. Before accepting any new customer, the Company has internal standard operating practice of assessing the credit worthiness based on experience in cement business, securities offered and credit risk covered by sales promoters. The Company also has the practice of periodically assessing the performance of customer and rerating the customer.

Trade receivables consist of a large number of customers spread across diverse industries and geographical areas with no significant concentration of credit risk. No single customer accounted for 10.0% or more of revenue in any of the years indicated. The outstanding trade receivables are regularly monitored and appropriate action is taken for collection of overdue receivables.

As per simplified approach, the Company makes provision of expected credit losses on trade receivables using a provision matrix to mitigate the risk of default payments and makes appropriate provision at each reporting date wherever outstanding is for longer period and involves higher risk.

Our historical experience of collecting receivables indicate a low credit risk. Hence, trade receivables are considered to be a single class of financial assets.

The Company has a practice of periodically reviewing outstanding receivables for recoverability and making provisions for expected credit losses and also on case to case basis wherever required. As per policy receivables are classified into different buckets based on the overdue period ranging from 6 months – one year to more than three year. There are different provisioning norms for each bucket which are ranging from 3% to 55%.

The movement in allowance for Expected credit loss is as follows:

Particular	₹ crore
As at 1st April 2022	1.50
Additional allowance As at 31st March 2023	(0.16) 1.34
Additional allowance	7,23
As at 31st March 2024	8.57

Cash and cash equivalents:

Credit risks from balances with banks and financial institutions are managed in accordance with the Company policy. For derivative and financial instruments, the Company attempts to limit the credit risk by only dealing with reputable banks and financial institutions having high credit-ratings assigned by credit-rating agencies.

The Company's maximum exposure to the credit risk for the components of balance sheet as 31st March 2024 and 31st March 2023 is the carrying amounts mentioned in Note no 16,

Loans and investment

The Company's centralised treasury function manages the financial risks relating to the business. The treasury function focusses on capital protection, liquidity and yield maximisation. Investments of surplus funds are made only in approved counterparties within credit limits assigned for each of the counterparty. The limits are set to minimise the concentration of risks and therefore mitigate the financial loss through counter party's potential failure to make payments.

iv) Liquidity risk management

Liquidity risk refers to the risk of financial distress or extraordinary high financing costs arising due to shortage of liquid funds in a situation where business conditions unexpectedly deteriorate and requiring financing. The Company requires funds both for short term operational needs as well as for long term capital expenditure growth projects. The Company generates sufficient cash flow for operations, which together with the available cash and cash equivalents provide liquidity in the short-term and long-term. The Company has acceptances in line with supplier's financing arrangements which might invoke liquidity risk as a result of liabilities being concentrated with few financial institutions instead of a diverse group of suppliers. The Company has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity managements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods and its non-derivative financial assets. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting year. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Liquidity exposure as at 31st March 2024

Collateral

The Company has pledged part of its trade receivables in order to fulfil certain collateral requirements for the banking facilities extended to the Company. There is obligation to return the securities to the Company once these banking facilities are surrendered.

The amount of guarantees given on behalf of Subsidiaries/Joint ventures included in note 37 represents the maximum amount the Company could be forced to settle for the full guaranteed amount. Based on expectation at the end of the reporting year, the Company considers that it is more likely that such an amount will not be payable.

v) Foreign currency risk management

The Company's functional currency is Indian Rupees (INR). The Company undertakes transactions denominated in foreign currencies; consequently, exposure to exchange rate fluctuations arise. Volatility in exchange rates affects the Company's revenue from export markets and the costs of imports, primarily in relation to raw materials. The Company is exposed to exchange rate risk under its trade and debt portfolio.

Adverse movements in the exchange rate between the Rupee and any relevant foreign currency result's in increase in the Company's overall debt position in Rupee terms without the Company having incurred additional debt and favourable movements in the exchange rates will conversely result in reduction in the Company's receivables in foreign currency.

All hedging activities are carried out in accordance with the Company's internal risk management policies, as approved by the Board of Directors, and in accordance with the applicable regulations where the Company operates.

The carrying amounts of the Company's monetary assets and monetary liabilities at the end of the reporting period are as follows:

vi) Commodity price risk

The Company purchases its raw material in the open market from third parties. The Company is therefore subject to fluctuations in prices for the purchase of Bulk Raw material. The Company purchased substantially all of its Bulk Raw material from third parties in the open market during the year.

If Bulk Raw material import price had been 1 US Dollar higher / lower and all other variables were constant, the company's profit for the year ended 31st March 2024 would decrease / increase by ₹ 7.02 crore (for the year ended 31st March 2023: decrease / increase by ₹ 1.67 crore).

The Company being the holding company will extend financial support to its subsidiaries as and when required.

c) Employee share based payment plans:

The Company has provided share-based payment schemes to its employees.

ESOP Plan 2016: The Company in the shareholders meeting held on 30th March, 2016 approved the JSW Cement Employee Stock Ownership Plan- 2016 ('ESOP Plan 2016') which was amended by the shareholders in their Extraordinary General Meeting held on May 21, 2016 and further amended in Extraordinary General Meeting held on May 30, 2017. Under the ESOP Plan 2016, all employees designated as Junior Manager (L08) and above receive grants based on defined criteria. Under this plan three grants were given 1st on 1st April 2016, 2nd on 1st April 2017 and 3rd on 1st April 2018.

ESOP Plan 2021: The Company in the Extra-Ordinary meeting held on 30th November 2021 approved the JSW Cement Employee Stock Ownership Plan 2021 ('ESOP Plan 2021') which covers all the employees working in the Company. Under ESOP Plan 2021, all the employees on the company payroll will receive grants based on defined criteria. Under this plan, the Company has given 1st Grant on 1st December, 2021, 2nd Grant on 1st April 2022 and 3rd on 23rd February 2024.

The total number of grants available under both ESOP plan is 4,10,98,010

During the year the Company has aligned both the plans as per the provision of the Securities and Exchange Board of India (Share Based Employee Benefits and Sweat Equity) Regulations 2021

The key terms of and position grants under both the plans are as under:

ESOP Plan 2016 plan - Outstanding and relevant terms are as follows:

Expenses related to current financial year is debited to Statement of Profit & Loss ₹ 23.50 crore (Previous Year ₹ 43.55 crore).

d) Employee Benefits:

1) Defined contribution plan:

The Company operates defined contribution retirement benefit plans for all qualifying employees. Under these plans, the Company is required to contribute a specified percentage of payroll costs

Company's contribution to provident fund & family pension scheme recognised in Statement of Profit and Loss of 8.61 crore (31st March, 2023: 7.86 crore) (included in note 32).

2) Defined benefit plans

Under the Gratuity plan, the eligible employees are entitled to post-retirement benefit at the rate of 15 days salary for each year of service until the retirement age of 58 and 60 without any payment ceiling. The vesting period for Gratuity as payable under The Payment of Gratuity Act, 1972 is 5 years.

The fund is managed by JSW Cement Employee Gratuity Trust and it is governed by the Board of trustees. The Board of trustees are responsible for the administration of the plan assets and for defining the investment strategy.

During the financial year 2022-2023, the compensated absence plans were revised as detailed below:

- 1. Privileged Leave (PL) Unutilised PL balance at the end of the calendar year (31st December) shall be encashed at the prevailing basic pay and no carry forward is allowed.
- 2. Contingency Leave (CoL) The existing casual leave and sick leave were clubbed together and shall be called as CoL. The annual credit of a contingency leave shall be 14 days for plant locations and 8 days for Corporate and other locations. Maximum accumulation of 30 days is allowed and cannot be encashed.

The plans in India typically expose the Company to actuarial risks as per table below.

Investment risk	The probability or likelihood of occurrence of losses relative to the expected return on any particular investment
Interest risk	The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability
Liquidity risk	This is the risk that the Company is not able to meet the short-term gratuity payouts. This may arise due to non availability of enough cash / cash equivalent to meet the liabilities or holding of illiquid assets not being sold in time
Salary escalation risk	The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
Demographic risk	The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption
Regulatory risk	Gratuity benefit is paid in accordance with the requirements of the Payment of Gratuity Act, 1972 (as amended from time to time). There is a risk of change in regulations requiring higher gratuity payouts
Market risk	The duration of the liability is longer compared to duration of assets, exposing the Company to market risk for volatilities/fall in interest rate

No other post-retirement benefits are provided to these employees.

The most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out at 31st March 2024 by Independent, Qualified Actuary. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method

(i) Gratuity		₹ crore
	As at	As at

	(2012-14)	(2012-14)

The Company has created irrevocable trust named "JSW Cement Employees' Gratuity Trust" for providing gratuity benefits to the employees and current year contribution to the trust is ₹ 6.30 crore (Previous Year ₹ 2.02 crore).

g. Experience adjustments:

Particulars	2023-24 Funded	2022-23 Funded	2021-22 Funded	2020-21 Funded	2019-20 Funded
Defined Benefit Obligation	22.46	17.48	13.46	10.95	9.47
Plan Assets	19.56	12.77	11.64	11.06	7.78
(Deficit)/ surplus	(2.90)	(4.71)	(1.82)	0.11	(1.69)
Experience Adjustments on Plan Liabilities –Loss/(Gain)	(1.10)	1.30	0.03	(0.73)	(0.30)
Experience Adjustments on Plan Assets –Loss/(Gain)	5	35.	*	:5	0.09

- h. The Company expects to contribute ₹ 6.25 crore (Previous year ₹ 7.42 crore) to its gratuity plan for the next year.
- i. The average duration of the defined benefit plan obligation at the end of the reporting period is 5 years (31st March, 2023: 5 years)
- j. The discount rate is based on the prevailing market yields of Government of India securities as at the balance sheet date for the estimated term of the obligations.
- **k.** The salary growth rate indicated above is the Company's best estimate of an increase in salary of the employees in future years, determined in actuarial valuation considering the general trend in inflation, seniority, promotions, past experience and other relevant factors such as demand and supply in employment market, etc.
- I. Expected return on plan assets is based on expectation of the average long term rate of return expected on investments of the fund during the estimated term of obligation after considering several applicable factors such as composition of plan assets, investment strategy, market scenario etc.

Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below has been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

Particulars		As at 31 st March 2024		As at 31 st March 2023	
	Increase	Decrease	Increase	Decrease	
Discount rate (1% movement)	(1.15)	1.27	(0.88)	0.97	
Future salary growth (1% movement)	1.23	(1.13)	0.96	(0.89)	
Attrition rate (50% attrition rate)	(1.12)	2.03	(0.36)	0.53	

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting year, which is the same as that applied in calculating the defined benefit obligation recognised in Balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

Maturity Profile of Defined Benefit Obligation

Particulars	As at 31 st March 2024	As at 31 st March 2023
Weighted average duration (based on discounted cash-flows)	5 years	5 years
1 Year	3.77	2.93
2 to 5 Year	12.28	9.77
6 to 10 Year	9.82	7.87
More than 10 Years	9.86	7.18

ii) Compensated Absences

Particulars	As at 31 st March 2024	As at 31 st March 2023
Present value of obligation	3.25	3.64
Expense recognised in Statement of Profit and loss	0.73	2.72
Discount rate (p.a.)	7.20%	7.30%
Salary escalation (p.a.)	10.00%	8.00%

The Company has a policy on compensated absences with provisions on accumulation and encashment by the employees during employment or on separation from the Company due to death, retirement or resignation. The expected cost of compensated absences is determined by actuarial valuation performed by an independent actuary at the balance sheet date using projected unit credit method.

3) Code on Social Security, 2020

The Code on Social Security, 2020 ("the Code") received presidential assent on 28th September, 2020. However, the date on which the Code will come into effect has not yet been notified. The Company will record any related financial impact of the Code in the books of account, in the period(s) in which the Code becomes effective.

e) Segment reporting:

The Company is primarily in the business of manufacturing and sale of cement and cement related product. As per IND AS 108 "Operating Segments" specified under Section 133 of the Companies Act 2013, there are no other reportable business applicable to the Company.

The information relating to revenue from external customers and location of non-current assets of its single reportable segment has been disclosed as below.

a) Revenue from operations

₹ crore

		For the year	For the year
		ended 31st	ended 31st
		March 2024	March 2023
Domestic		5,773.2	4,693.36
Export		21.5	77.38
	Total	5,794.80	4,770.74

Revenue from operations have been allocated on the basis of location of customers.

b) Non-current operating assets

All non-current assets (other than financial instruments, deferred tax assets) of the Company are located in India

f) Earnings per share (EPS):

	For the year	For the year
Particulars	ended 31st	ended 31st
	March 2024	March 2023
Profit attributable to equity shareholders (₹ in crore) (A)	220.92	249.75
Weighted average number of equity shares at for basic EPS (B)	986,352,230	986,352,230
Effect of dilution :		
Weighted average number of ESOP	14,166,953	14,282,552
Weighted average number of equity shares adjusted for the effects of dilution* (C)	1,000,519,183	1,000,634,782
Basic EPS (Amount in ₹) : (A/B)	2.24	2.53
Diluted EPS (Amount in ₹) : (A/C)	2.21	2.50

^{*} As per subscription agreement, No of equity shares to be issued by Company to investors against Compulsory convertible preference shares are dependent upon fair value of the Company on date of conversion and accordingly, have not been considered for determination of basic and diluted earnings per share, as applicable for the year.

g) Financial Guarantee

The Company has issued financial guarantees to bank on behalf of and in respect of loan facilities availed by subsidiaries/Joint venture.

Refer below for details of exposure towards Financial guarantee issued:

₹ crore

	As at 31st	As at 31st
Particulars	March 2024	March 2023
	Guarantee	Guarantee
	issued	issued
Guarantees for loans taken by JSW Cement FZC	1,411.00	1,411.00
Guarantees for loans taken by Shiva Cement Limited	850.00	1,066.00
Total	2,261.00	2,477.00

- h) As at 31st March, 2024; the current liabilities exceeds current assets of the Company by ₹ 806.71 crore. Basis predicted cash flows from operations for the financial year 2024-25 and sanctions received from lenders to refinance the long-term borrowings, the management is confident that the Company would be in a position to service its liabilities in the foreseeable future.
- i) The Company has been maintaining its books of accounts in the SAP which has feature of recording audit trail of each and every transaction, creating an edit log of each change made in books of account along with the date when such changes were made and ensuring that the audit trail cannot be disabled, throughout the year as required by proviso to sub rule (1) of rule 3 of The Companies (Accounts) Rules, 2014 known as the Companies (Accounts) Amendment Rules, 2021. However, the audit trail feature is not enabled for direct changes to data in the underlying database. The Company as per its policy has not granted privilege access for change to data in the underlying database as evident from the manual log being maintained in this regard. The Company did not come across any instance of audit trail feature being tampered with, in respect of accounting software for the period for which the audit trail feature was operating.

The Company in the month of March, 2024 has also implemented Privileged Access Management tool (PAM), onboarded the SAP database servers on the PAM tool and the process of monitoring database is currently under testing phase. The PAM is an identity management tool which focuses on the control, monitoring, and protection of privileged accounts within an organization. The PAM tool saves complete screen video recording sessions of all the admin activities as soon as they authenticate on the PAM console and connect to the target resources (Servers, Network Devices, Applications and Database) which acts as an audit trail feature.

j) The Kolkata Bench of the National Company Law Tribunal (NCLT), through its order dated 12th March 2024 and the Mumbai Bench of the NCLT, through its order dated 6th May 2024, had approved the scheme of Amalgamation of its wholly-owned subsidiaries, Springway Mining Private Limited and NKJA Mining Private Limited with the Company effective from 10th October 2022. Accordingly, the Company had accounted for the amalgamation as per approved scheme. The Impact of the amalgamation on these standalone financial statements is as under:

Net assets acquired as on 10th October 2022

₹ crore

Particulars	Springway Mining	NKJA Mining	Total	
	Private Limited	Private Limited		
Assets				
Property, plant and equipment	18.84	e l	18.84
